Introduction

Metaverse Classic was inspired by Mark Zuckerberg's Dream to create a Virtual Reality world. Metaverse Classic's aim is to create a Virtual world where people can go to relax, play games, watch concerts, browse store shelves, and much more without leaving your (physical) home.

As the virtual world gains more control over the actual world, blockchain and cryptocurrencies will become increasingly significant. Buying or selling or trading of items like owning decentralized land, will all be legitimized by blockchain and cryptocurrencies in a trustless manner through tokens.

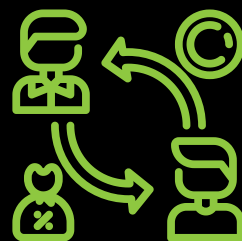

Why Metaverse Classic?

Deflationary Monetary System

Metaverse Classic \$MVC is deflationary token on the Binance Smart Chain BSC. A portion of the \$MVC Token has been specially allocated to be Burnt continuously! This Strategically reduces the Supply of \$MVC while increasing its value overtime. The Burning phase commences IMMEDIATELY after listing.

Locked Liquidity

\$MVC is Rugpull Proof. The team will lock liquidity immediately after listing on pancakeswap for 1 year.

Anti-Whale Implementation

NO MANIPULATION. NO MASSIVE DUMPS. PERIOD. We strive to build an ecosystem where every Investor has a equal chance at making profit.

Utility of MetaVerse Token

Payment System

Metaverse Class \$MVC Token will be used to buy land, buy items and and use other utilities inside the Metaverse ecosystem.

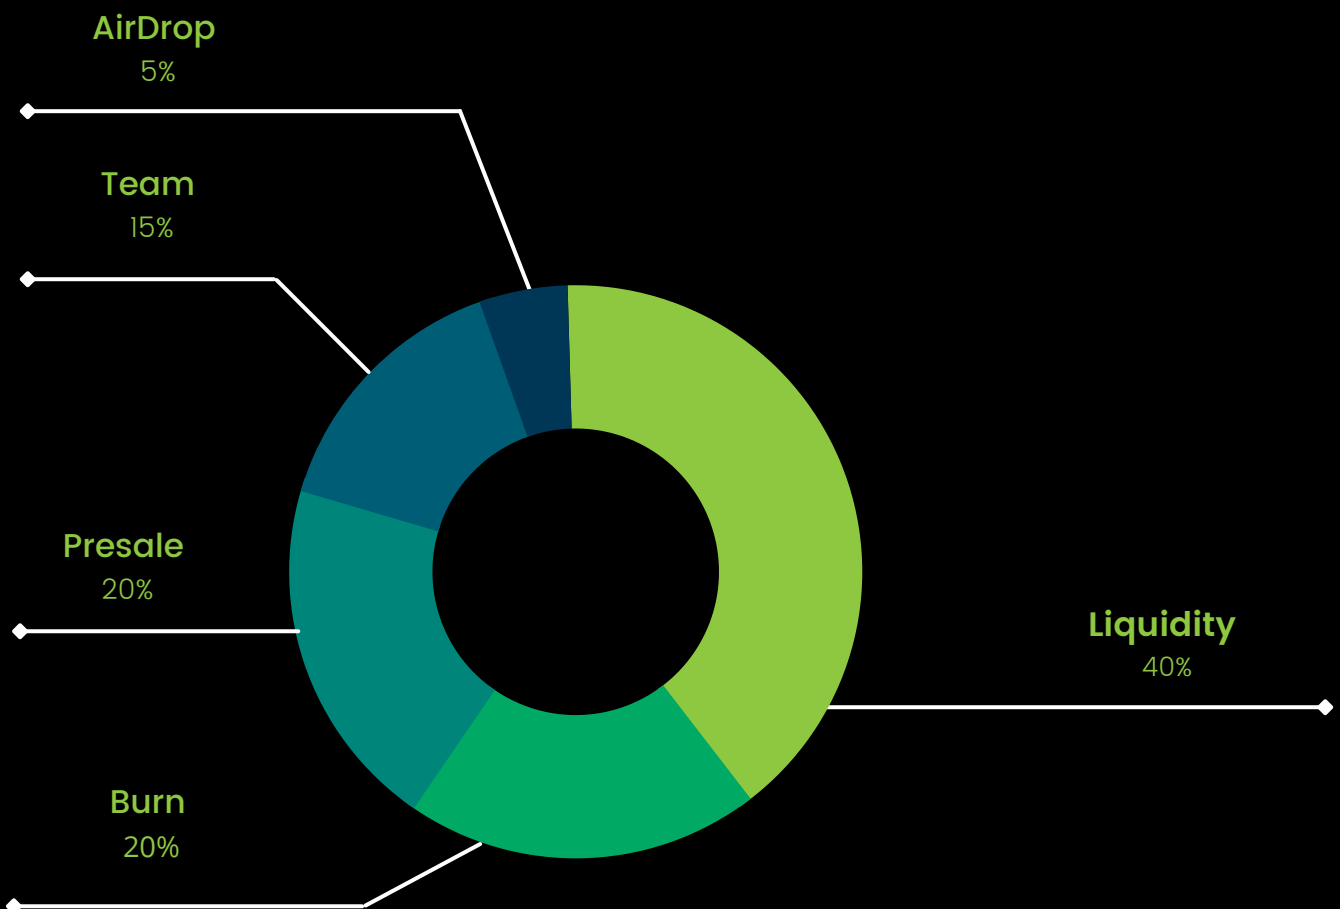

Rewards

Users can hold tokens to earn rewards and create a side earning stream for them.

Tokenomics

- The total supply of Metaverse Classic is 10,000,000,000,000 tokens Upon listing.
- Contract Address
0xc6328854de53705621c4a23c50a6a813dd69d5c3
- MetaverseClassic Presale will be held in a BSC launchpad of the team choosing and will be announced on the telegram and twitter channel
 - Team 15%
 - Airdrop 5%
 - Presale 20%
 - Liquidity 40%
 - Burn 20%

Roadmap

PHASE 1

1

- Website launch

PHASE 2

2

- Airdrop

PHASE 3

3

- Public sale (presale)
- Pancakeswap listing
- Liquidity provision and locking

PHASE 4

4

- Token Burn (Until total allocation is depleted)
- Coingecko & CMC listing

PHASE 5

5

- NFT marketplace Launch
- Metaverse Classic game launch
- Metaverse store launch

PHASE 6

6

- Strategic Partnership
